Part 1 – Introduction

1.1 Purpose

The purpose of this report is to present the design and specification of the *Pet Boarding and Daycare Reservation System* as part of the **Object-Oriented Application Development** assignment. The report highlights the application of object-oriented principles in developing a system that supports essential features such as user registration, service reservations, and administrative management. By outlining the system's scope, use cases, and functional requirements, this report demonstrates how object-oriented concepts can be applied to model and implement a practical software solution.

1.2 Scope

This report focuses on the analysis and design of the *Pet Boarding and Daycare Reservation System* within the academic context of the assignment. The system is intended to provide pet owners with the ability to register, manage their pets' profiles, and make reservations for boarding and daycare services. Administrative users are able to manage services, facilities, and user accounts through a centralized dashboard. Additional functionalities include secure authentication, booking cancellations, service pricing and payment, and staff management.

From a design perspective, the scope emphasizes the use of **object-oriented programming (OOP) principles**, including inheritance, polymorphism, encapsulation, and abstraction. The system will be structured into multiple interacting classes (e.g., User, Admin, Client, Pet, Service, etc.), each responsible for specific behaviours and data. The report documents these classes and their interactions using UML diagrams and use case descriptions.

While the scope covers requirements specification and system design, the implementation will be limited to a **console-based prototype** in Java, incorporating file handling for persistent storage and exception handling for robustness.

Part 2 – System Requirements Specification (SRS)

2.1 Users of the System

- Client – books services, views pets, views bookings.
 - Administrator – manages pets, services, staff, bookings, cancels bookings, monitors system usage.
-

2.2 Use Case Descriptions

UC1: User Registration & Login

- **Actors:** Client, Admin
 - **Precondition:** User is not logged in. For registration, account must not exist. For login, account must exist.
 - **Trigger:** User selects “Register” or “Login” from the Main Menu.
 - **Inputs:**
 - Registration: name, email, password, contact, pet ownership status.
 - Login: email, password.
 - **Outputs:**
 - Success/failure message.
 - User session established if login successful.
 - **Main Flow:**
 1. User selects Register or Login.
 2. If Register, user enters details; system validates uniqueness and format.
 3. If Login, user enters credentials; system validates match.
 4. System confirms success or failure.
 5. Successful login directs to respective dashboard (Admin/Client).
 - **Alternate Flow:**
 - A1: Registration email already exists → System rejects registration.
 - A2: Login credentials invalid → System shows error.
 - **Postcondition:** User registered or logged in successfully.
-

UC2: Pet Profile Management

- **Actors:** Client, Admin
 - **Precondition:** User must be logged in.
 - **Trigger:** User selects “Pet Management” from dashboard.
 - **Inputs:** Pet details (name, species, breed, age, medical info).
 - **Outputs:** Confirmation message; updated pet records.
 - **Main Flow:**
 1. User selects Add, View, Update, Search, or Delete Pet.
 2. User provides required details.
 3. System validates and saves changes.
 4. Updated pet profile displayed.
 - **Alternate Flow:**
 - A1: Invalid or missing details → System rejects update.
 - A2: Unauthorized action (client trying to delete another’s pet) → System rejects.
 - **Postcondition:** Pet profiles updated and stored successfully.
-

UC3: Service Browsing & Selection

- **Actors:** Client
- **Precondition:** Client must be logged in. Services must exist.
- **Trigger:** Client selects “Browse & Book Services.”
- **Inputs:** Search/filter criteria (service type, availability, date).
- **Outputs:** List of matching services.
- **Main Flow:**
 1. Client enters search criteria.
 2. System filters available services.
 3. System displays service list with details.
 4. Client selects desired service to proceed with booking.
- **Alternate Flow:**
 - A1: No services match criteria → System displays “No results.”

- **Postcondition:** Services displayed for client to select.
-

UC4: Reservation Booking & Management

- **Actors:** Client
 - **Precondition:** Client logged in, has pet profile, and service available.
 - **Trigger:** Client selects a service to book.
 - **Inputs:** Service ID, pet profile, booking date, time slot.
 - **Outputs:** Booking confirmation ID, summary.
 - **Main Flow:**
 1. Client selects service.
 2. Client links pet profile and chooses booking date/time.
 3. System validates availability.
 4. System saves booking and generates confirmation.
 - **Alternate Flow:**
 - A1: Service unavailable → System rejects booking.
 - A2: No pet profile available → Prompt client to add pet first.
 - **Postcondition:** Booking saved with “Active” status.
-

UC5: Booking Cancellation

- **Actors:** Client, Admin
- **Precondition:** Active booking exists.
- **Trigger:** User selects “Cancel Booking.”
- **Inputs:** Booking ID, cancellation reason.
- **Outputs:** Cancellation confirmation, updated booking status.
- **Main Flow:**
 1. User selects a booking to cancel.
 2. User confirms cancellation.
 3. System updates booking status to “Cancelled.”
 4. System displays confirmation.

- **Alternate Flow:**
 - A1: Booking already expired/cancelled → System rejects.
 - **Postcondition:** Booking status updated as “Cancelled.”
-

UC6: Booking & Pet History Reports

- **Actors:** Client, Admin
 - **Precondition:** User must be logged in.
 - **Trigger:** User selects “View Booking History.”
 - **Inputs:** Query parameters (date range, booking status).
 - **Outputs:** Report of bookings or pet history.
 - **Main Flow:**
 1. User selects type of report (Active/Expired/Cancelled).
 2. System retrieves relevant records.
 3. System displays report.
 - **Alternate Flow:**
 - A1: No history records → System shows empty message.
 - **Postcondition:** User views booking or pet history.
-

UC7: Admin Service Management

- **Actors:** Admin
- **Precondition:** Admin logged in.
- **Trigger:** Admin selects “Manage Services.”
- **Inputs:** Service details (name, type, price, description, availability).
- **Outputs:** Updated service records.
- **Main Flow:**
 1. Admin selects Add, Edit, View, or Delete service.
 2. Admin enters details.
 3. System validates and updates records.
 4. Updated service list displayed.

- **Alternate Flow:**
 - A1: Invalid details → System rejects update.
 - **Postcondition:** Service records updated successfully.
-

UC8: Staff Management

- **Actors:** Admin
 - **Precondition:** Admin logged in.
 - **Trigger:** Admin selects “Staff Management.”
 - **Inputs:** Staff details (name, age, role, contact, email, status).
 - **Outputs:** Confirmation message; updated staff records.
 - **Main Flow:**
 1. Admin selects Add, View, Update, or Resign staff.
 2. Admin enters or modifies staff details.
 3. System validates contact/email formats.
 4. System saves staff record.
 - **Alternate Flow:**
 - A1: Invalid email/phone → System rejects input.
 - **Postcondition:** Staff records updated successfully.
-

UC9: Automated Booking Expiry

- **Actors:** System (auto process)
- **Precondition:** Active bookings exist in system.
- **Trigger:** Current date exceeds booking date.
- **Inputs:** Current date, stored booking date.
- **Outputs:** Updated booking status (“Expired”).
- **Main Flow:**
 1. System compares today’s date with all booking dates.
 2. If date passed, system updates status to “Expired.”

3. Expired bookings shown in reports.

- **Alternate Flow:**
 - None (auto process).
- **Postcondition:** Expired bookings updated without user action.

2.3 Functional Requirements

FR1. User Registration & Login

- **Input:** User details (name, email, password, contact, pet ownership status).
 - **Output:** Confirmation message (success/failure). Session established if login successful.
 - **Preconditions:** For registration, user must not already exist. For login, credentials must match stored records.
 - **User Interaction:** User fills registration form or login fields; system validates and provides feedback.
-

FR2. Pet Profile Management (Admin & Client)

- **Input:** Pet details (name, species, breed, age, medical info).
 - **Output:** Confirmation message; stored/updated pet profile in file.
 - **Preconditions:** User must be logged in. Clients can only manage their own pets; Admin can manage all users' pets.
 - **User Interaction:**
 - Client: View, add, update their pets.
 - Admin: Add, search, view all pets, update, and delete.
-

FR3. Service Browsing & Selection (Client)

- **Input:** Search/filter criteria (service type, availability, date range).
 - **Output:** List of available services with details (service type, price, availability).
 - **Preconditions:** User must be logged in. Services must exist.
 - **User Interaction:** Client browses services, applies filters, and selects a service to book.
-

FR4. Reservation Booking & Management (Client)

- **Input:** Selected service, pet profile, booking date(s), time slot, payment confirmation.
- **Output:** Booking confirmation ID, booking summary.
- **Preconditions:** Client must be logged in, have at least one pet, and service must be available.

- **User Interaction:** Client selects a service, links to pet, sets booking dates, and confirms. System saves booking and generates confirmation.
-

FR5. Booking Cancellation (Admin & Client)

- **Input:** Booking ID, cancellation reason.
 - **Output:** Cancellation confirmation; updated booking status; refund info if applicable.
 - **Preconditions:** Booking must exist and be active.
 - **User Interaction:**
 - Client cancels their own booking.
 - Admin can cancel any user's booking.
-

FR6. Booking & Pet History Reports

- **Input:** Query parameters (date range, user ID, pet ID, booking status).
 - **Output:** Report of active, expired, or cancelled bookings; pet's stay history.
 - **Preconditions:** User must be logged in. Clients see their own records; Admin sees all.
 - **User Interaction:** User selects report option (active/expired/cancelled) and system displays.
-

FR7. Admin Service Management

- **Input:** Service details (service name, type, price, description, availability).
 - **Output:** Updated list of services.
 - **Preconditions:** User must be logged in as Admin.
 - **User Interaction:** Admin views, adds, edits, or deletes services.
-

FR8. Staff Management (Admin)

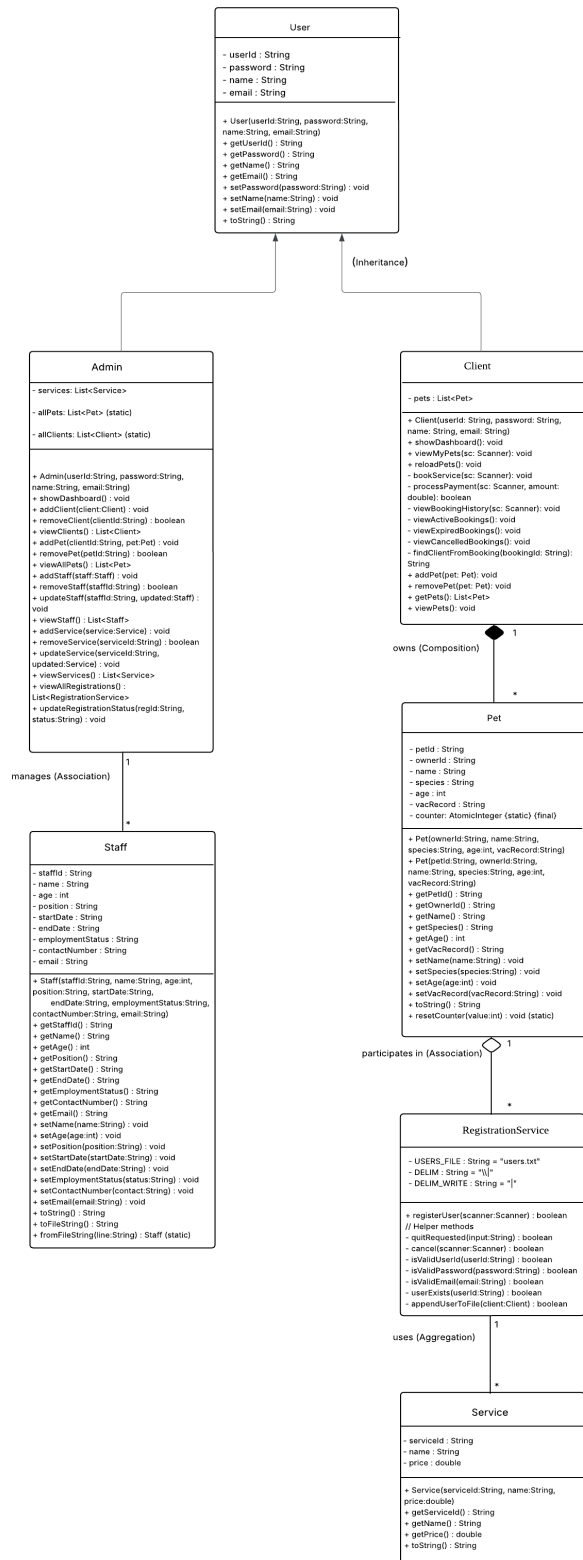

- **Input:** Staff details (ID, name, age, position, contact, email, employment dates, status).
- **Output:** Updated staff records stored in system.
- **Preconditions:** User must be Admin.
- **User Interaction:** Admin can:

- Add staff profile.
 - View staff list.
 - Update staff details.
 - Mark staff as resigned (instead of deleting).
-

FR9. Automated Booking Expiry

- **Input:** Current system date vs. booking date.
- **Output:** Bookings automatically updated from “Active” to “Expired” when date passes.
- **Preconditions:** Booking exists in system; system date > booking date.
- **User Interaction:** Runs in background when user logs in or admin views bookings.

Part 3 – UML Class Diagram

Utils
+ clearScreen() : void (static) + pause(sc:Scanner) : void (static) + isValidDate(dateStr:String) : boolean (static) + updateExpiredBookings() : void (static) + isValidPhone(phone:String) : boolean (static) + isValidEmail(email:String) : boolean (static) - removeTime(date: Date): Date

(Dependency from Admin/Client)

Main
- scanner: Scanner - users: List<User>
+ main(args: String[]): void + handleLogin(): void - initializeUsers(): void - authenticateUser (username: String, password: String):User

(Dependency on all)

Part 4 – Implementation of Design

4.1 Source Code – Java and 4.2 Sample Input Data

Please refer to the *javacode* folder.

4.3 Sample Output

1. User Interface

```
=====
  Pet Boarding & Daycare System
=====

Main Menu:
1. User Registration
2. Login
0. Exit
Enter your choice: |
```

This is the main menu for the Pet Boarding & Daycare System program. The users need to enter a number to choose what to do next. Press 1 to register a new account, press 2 to log in to an existing account, or press 0 to exit and close the program.

If the user enters an invalid input:

```
=====
  Pet Boarding & Daycare System
=====

Main Menu:
1. User Registration
2. Login
0. Exit
Enter your choice: 4
|△ Invalid choice. Please select 1-4.
Press Enter to continue...
```

2. User registration

```
=== User Registration ===  
Enter UserID (4-12 alphanumeric) or 'q' to quit: U004  
Enter Password (8-24 characters) or 'q' to quit: 12543265  
Confirm Password: 12543265  
Enter Full Name (or 'q' to quit): Umar  
Enter Email (or 'q' to quit): umar@gmail.com  
|  
Registration successful. You may now login.  
Press Enter to continue...
```

This screen shows the registration process where a user can enter their details to create a new account. The user must provide a UserID (4-12 characters), a password (8-24 characters), confirm the password, enter their full name, and provide an email address. After submitting all required information, the system confirms successful registration and allows the user to proceed to login.

3. User Login

```
===== Login Page =====  
Enter user ID: U004  
Enter password: 12543265  
  
Login successful!  
Press Enter to continue...
```

This screen shows the login process. The user enters their ID and password. The system verifies the credentials and confirms a successful login.

If the user keys in an incorrect password or User ID:

```
===== Login Page =====  
Enter user ID: U004  
Enter password: 12345  
|  
Invalid credentials. Exiting system.
```

After user press enter:

```
===== Client Dashboard =====  
Welcome, Umar  
1. View Pet Profiles  
2. Browse & Book Services  
3. View My Booking & Pet History  
0. Logout  
Enter choice:
```

If the user presses 1 on the Client Dashboard (User can view their pet profiles):

```
===== Client Dashboard =====  
Welcome, Alice  
1. View Pet Profiles  
2. Browse & Book Services  
3. View My Booking & Pet History  
0. Logout  
Enter choice: 1  
=== Your Pets ===  
1. P1001 | Bella | Dog | 2 | 15/05/2024  
Press Enter to continue...
```

If the user presses 2 on the Client Dashboard (User can browse & book services):

```
===== Client Dashboard =====
Welcome, Alice
1. View Pet Profiles
2. Browse & Book Services
3. View My Booking & Pet History
0. Logout
Enter choice: 2
=== Your Pets ===
1. P1001 | Bella | Dog | 2 | 15/05/2024
Select pet (1-1, q to cancel): 1
=== Services ===
1. S1 | Dog Boarding | RM50.0
2. S2 | Cat Daycare | RM30.0
3. S3 | Grooming | RM40.0
4. S4 | Pet Training | RM100.0
Select service (1-4, q to cancel): 1
Enter booking date (dd/MM/yyyy, within 1 month, q to cancel): 20/09/2025
Enter booking time (HH:mm, 09:00-17:00, q to cancel): 10:00

=== Booking Summary ===
Pet: P1001 | Bella | Dog | 2 | 15/05/2024
Service: Dog Boarding (50.0)
Date: 20/09/2025
Time: 10:00
Confirm booking? (y/n): y
=== Payment Page ===
Amount to pay: RM 50.0
Enter 'y' to confirm transaction: y
☑ Booking confirmed! ID: B1757853403487
Press Enter to continue...
```

If the user presses 3 on the Client Dashboard (User can view their booking and pets' history):

```
=== Booking History for Alice ===
1. View Active Bookings
2. View Expired Bookings
3. View Cancelled Bookings
0. Back
Enter choice: 1

--- Active Bookings ---
Booking ID: B001 | Pet ID: P1001 | Service: Dog Boarding | Amount Paid: 50 | Date: 20/09/2025 | Time: 10:00 | Status: active
Press Enter to continue...
```

```
=== Booking History for Alice ===
1. View Active Bookings
2. View Expired Bookings
3. View Cancelled Bookings
0. Back
Enter choice: 2
|
--- Expired Bookings ---
No expired bookings.
Press Enter to continue...
```

```
=== Booking History for Bob ===
1. View Active Bookings
2. View Expired Bookings
3. View Cancelled Bookings
0. Back
Enter choice: 3
|
--- Cancelled Bookings ---
Cancelled ID: C001 | Booking ID: B002 | Cancelled At: 22/09/2025, 14:30:00 | Refunded Amount: 30
Press Enter to continue...
```

4. Admin Interface

```
===== Admin Dashboard =====  
Welcome, Admin  
1. Manage Pet Profiles (all users)  
2. Browse & Manage Services  
3. View All Bookings  
4. Booking Cancellation  
5. Staff Management  
0. Logout  
Enter choice:
```

This screen shows the Admin Dashboard. The menu provides six options: the admin can manage all user pet profiles (1), handle service offerings (2), view all bookings (3), cancel bookings (4), manage staff accounts (5), or logout (6).

After the admin selects option 1 (Manage Pet Profiles) from the main Admin Dashboard. It shows the Pet Management sub-menu:

```
=== Admin Pet Management ===  
1. Add Pet  
2. View All Pets  
3. Search Pets  
4. Update Pet  
5. Delete Pet  
0. Back  
Choose:
```

If Admin chooses 1 (process of creating a new pet profile):

```
Choose: 1  
Enter client username (q to cancel): U004  
Enter pet name (q to cancel): Mio  
Enter species/breed (q to cancel): Cat  
Enter age (q to cancel): 8  
Enter vaccination date (dd/MM/yyyy) or '-' if none (q to cancel): -  
  
=== Confirm Pet Profile ===  
Pet ID: P1004  
Owner: U004  
Name: Mio  
Species: Cat  
Age: 8  
Vaccination: -  
Save this pet profile? (y/n): y  
☒ Pet profile created & saved to file!  
Press Enter to continue...
```

If Admin chooses 2 (view all pets):

```
Choose: 2
=== All Pets ===
P1001 | Bella | Dog | 2 | 15/05/2024
P1002 | Luna | Cat | 1 | -
Press Enter to continue...
```

If Admin chooses 3 (process of searching pets):

```
Choose: 3
Enter search keyword (petId, name, breed, or age): P1001
=== Search Results ===
P1001 | Bella | Dog | 2 | 15/05/2024
Press Enter to continue...
```

If Admin chooses 4 (process of updating a pet profile):

```
Choose: 4
Enter PetID to edit (q to cancel): P1002

=== Current Pet Profile ===
P1002 | Luna | Cat | 1 | -
Enter new name (Enter to keep "Luna"): Luna
Enter new species/breed (Enter to keep "Cat"): Cat
Enter new age (Enter to keep "1"): 1
Enter new vaccination date (dd/MM/yyyy) or '-' (Enter to keep "-"): -

=== Confirm Updated Profile ===
Pet ID: P1002
Owner ID: U002
Name: Luna
Species: Cat
Age: 1
Vaccination: -
Save changes? (y/n): y
☒ Pet profile updated!
```

If Admin chooses 5 (pet deletion process):

```
Choose: 5
Enter PetID to delete (q to cancel): P1002

Pet found:
P1002 | Luna | Cat | 1 | -
Are you sure you want to delete this pet? (y/n): n
Deletion cancelled.
```

After the admin selects option 2 (Browse & Manage Services) from the main Admin Dashboard. It shows the Service Management menu:

```
===== Manage Services =====
1. View Services
2. Add Service
3. Edit Service
4. Delete Service
0. Back
Enter choice:
```

If Admin chooses 1 (Display service):

```
Enter choice: 1
=== Services ===
1. ID: S1 | Name: Dog Boarding | Price: 50.0
2. ID: S2 | Name: Cat Daycare | Price: 30.0
3. ID: S3 | Name: Grooming | Price: 40.0
4. ID: S4 | Name: Pet Training | Price: 100.0
Press Enter to continue...
```

If Admin chooses 2 (process of adding a new service):

```
Enter choice: 2
Enter service name (or 'q' to cancel): Pet Walking
Enter price (or 'q' to cancel): 20.00

=== New Service Summary ===
ID: S5
Name: Pet Walking
Price: 20.0
Confirm add? (y/n): y
☑ Service added.
Press Enter to continue...
```

If Admin chooses 3 (process of editing a service):

```
Enter choice: 3
=== Services ===
1. ID: S1 | Name: Dog Boarding | Price: 50.0
2. ID: S2 | Name: Cat Daycare | Price: 30.0
3. ID: S3 | Name: Grooming | Price: 40.0
4. ID: S4 | Name: Pet Training | Price: 100.0
5. ID: S5 | Name: Pet Walking | Price: 20.0
Enter serviceId to edit (or 'q' to cancel): S5
Enter new name (Pet Walking, press Enter to keep):
Enter new price (20.0, press Enter to keep): 30.00

=== Updated Service Summary ===
ID: S5
Name: Pet Walking
Price: 30.0
Save changes? (y/n): y
[✓] Service updated.
Press Enter to continue...
```

If Admin chooses 4 (process of deleting a service):

```
Enter choice: 4
=== Services ===
1. ID: S1 | Name: Dog Boarding | Price: 50.0
2. ID: S2 | Name: Cat Daycare | Price: 30.0
3. ID: S3 | Name: Grooming | Price: 40.0
4. ID: S4 | Name: Pet Training | Price: 100.0
5. ID: S5 | Name: Pet Walking | Price: 30.0
Enter serviceId to delete (or 'q' to cancel): S5

=== Service to Delete ===
ID: S5
Name: Pet Walking
Price: 30.0
Are you sure you want to delete this service? (y/n): y
[X] Service deleted.
Press Enter to continue...
```

After the admin selects option 3 (View All Bookings) from the main Admin Dashboard. It shows all booking history:

```
=== All Booking History ===
1. View Active Bookings
2. View Expired Bookings
3. View Cancelled Bookings
0. Back
Enter choice: 1

--- Active Bookings (All Clients) ---
Booking ID: B1757854166929 | Pet ID: P1002 | Client ID: U002 | Service: Cat Daycare | Amount Paid: 30.0 | Date: 21/09/2025 | Time: 09:00 | Status: active
